

St. Croix Avis

76TH YEAR.

CHRISTIANSTED, V. I. U. S. THURSDAY 19TH JANUARY 1917.

No. 14

THE ST. CROIX AVIS

is printed and published daily (Sundays and Holidays excepted) by G. Johansen at the Avis Office.

TERMS--50 cents monthly in advance,
2 cents per single copy.

Entered as second-class matter May 26th 1917 at the Post Office at Christiansted, St. Croix, V. I. of the U. S. A., under the Act of March 3, 1879.

Contribution to this paper will be gladly received when the same deals with matters of general interest, and is accompanied with the author's name, as a guarantee of good faith. The editor cannot be responsible for the views of his correspondents nor does he necessarily endorse them.

TELEGRAMS.

ST. CROIX STATION.

Madras, India, Jan. 13th.—The Prince of Wales arrived here today. There was rather serious rioting in some sections of the city, resulting in several casualties. The rioting became so intense that the police interfered with armoured cars.

Barbados, Jan. 13th.—Major the Hon E. Wood and party arrived here at 10 a. m. today in H. M. S. Valerian. On landing they were received by his Excellency the Governor members of the executive committee and members of the legislature, heads of Government departments, Members of consular body and members of the Vestry of St. Michael's. A cordial welcome was extended to the distinguished party who drove to Governor's house.

London, Jan. 14th.—Mustapha Kemal Pasha, the Turkish Nationalist leader, has been murdered, says an exchange telegraph despatch from Constantinople today quoting a report from Angora, the Turkish Nationalist capital.

Paris, Jan. 14th.—The surrender of the Germans charged with offences in connection with the war, to the Allies for trial is recommended in two resolutions by the Allied commission on war crimes made public today. The commission's first resolutions finds the conduct of the recent trials at Leipzig unsatisfactory, except for a few cases, and that the procedure of the trial was not such as to elicit truth. There were acquittals where should have been convictions, and light sentences, instead of heavy. The second resolution holds it is useless to submit further cases for trial by the Leipzig court and recommends giving effect to article 238 of the treaty of Versailles, providing for Germany's surrender to the Allies of any identified persons charged with war offences for trial by the Allies.

Make This Test

See how teeth glisten then

This ten-day test costs nothing. To millions it has brought a new era in teeth cleaning. This is to urge that you try this method. Then let your own teeth show you what it means to you and yours.

To fight the film

The object is to fight the film which causes most tooth troubles. Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. The best methods of brushing do not end it. So, despite all care, tooth troubles have been constantly increasing.

It is the film-coat that discolors, not the teeth. And nearly all teeth brushed in old ways are coated more or less.

Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. And that disease has become alarming in extent.

Pepsodent
REG. U. S. PAT. OFF.

The New-Day Dentifrice

A scientific film combatant, combined with two other modern requisites. Now advised for daily use by leading dentists everywhere. Supplied by druggists in large tubes.

Free

A 10-Day Tube of Pepsodent to anyone who asks.

It will show you the way to safer, whiter teeth.

See below.

A daily combatant

Dental science has now found ways to daily combat this film. For five years the methods have been carefully watched and proved. Now leading dentists everywhere advise them.

These methods are embodied in a dentifrice called Pepsodent. Millions now know it and employ it. Wherever you look the results are seen in glistening teeth today.

Acts in five ways

One ingredient in Pepsodent is pepsin. Another multiplies the starch digestant in the saliva to digest starch deposits that cling. The alkalinity of the saliva is multiplied also. That to neutralize the acids which cause tooth decay.

Two factors directly attack the film. One of them keeps teeth so highly polished that film cannot easily adhere.

With every application, Pepsodent combats the teeth's great enemies in new and efficient ways. To millions it is bringing cleaner, safer, whiter teeth.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

This test will be a revelation. Make it now. Cut out the coupon so you don't forget.

10-Day Tube Free
