

There is Strength in Every Tablet

One dose often helps commence to enrich your blood and revitalize your worn-out exhausted nerves—Nuxated Iron is organic iron, like the iron in your blood and like the iron in spinach. It is so prepared that it will not injure the teeth nor disturb the stomach. It is ready for almost immediate absorption and assimilation by the blood while some physicians claim metallic iron which people usually take is not absorbed at all. If you are not strong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of Nuxated Iron—three times per day, after meals for two weeks. Then test your strength again and

see how much you have gained. Your money will be refunded by the manufacturers if you do not obtain perfectly satisfactory results. At all druggists.

NUXATED IRON
Enriches the Blood—Strengthens the Nerves

This Offers You

what you'll be glad to know

A new-type tooth paste, based on modern research, has brought rich benefits to millions. Dentists the world over now advise its use. You see one of its results in glistening teeth wherever you look today.

This offers you a delightful test, to show what it means in your home.

The foe of film

Your teeth are coated with a viscous film. No ordinary tooth paste can effectively combat it. So it clings to teeth, enters crevices and stays. Most tooth troubles, most dingy teeth, are due to that clinging film.

Film absorbs stains, making the teeth look cloudy. It forms the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Germes breed by millions in it.

They, with tartar, are the chief cause of pyorrhea.

It was alarming

Tooth troubles due to film were constantly increasing. Very few escaped. The situation was alarming. So dental science sought for film combatants.

Research discovered two. One acts to curdle film, one to remove it, and without any harmful scouring. Able authorities proved those methods effective. Then a tooth paste was created, based on modern knowledge, and those two film combatants were embodied in it.

That tooth paste is called Pepsodent.

New protection

Pepsodent brings other new protection. It multiplies the alkalinity of the saliva. That is there to neutralize mouth acids, the cause of tooth decay.

It multiplies the starch diges-

This test is free.
See coupon.

tant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

In all these ways, Pepsodent is bringing to careful people of some 50 nations a new dental era,

Protect the Enamel

Pepsodent disintegrates the film, then removes it with an agent far softer than enamel. Never use a film combatant which contains harsh grit.

For beauty's sake

Men and women who want prettier teeth must fight that dingy film. People who want cleaner, safer teeth must combat it.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

What you see and feel will soon convince you. Cut out the coupon now.
