TERMS--50 cents monthly in advance.
2 cents per single copy.

Entered as second-class matter No. 26th 1917 at the Post Office at Christiansted, St. Croix, V. I. of the U. S. A., under the Act of March 3, 1879.

Contribution to this paper will be gladly received when the same deals with matters of general interest, and is accompanied with the author's name, as a guarantee of good faith. The editor cannot be responsible for the views of his correspondents nor does he necessarily endorse them.

Publication

FROM THE POLICE

ALL owners of dogs are enjoined with in the ending of January month to procure from the Police Office (for Kingshill District from Kingshill Police Station) the signs for dogs prescribed by the Police Regulations, which according to same must always be worn by the dog, and for which Franes 10.00 must be paid for dogs in town and Franes 2.00 for dogs in the country.

After said time dogs met not wearing the sign for 1921 will be caught and brought to the Police Office (Kingshill Police Station) and detained for 3 times 24 hours, when it will be killed, unless the owner appears to claim the dog, pays a fine of Franes 15.00 and eventually procures the required sign.

Christiansted's Police Office, St. Croix, the 29th December 1920.

A Gift

A 10-Day Tube of Pepsodent is sent to all who ask. See coupon.

This 10-Day Test

Has shown millions the way to white teeth

All statements approved by high dental authorities

This is how millions have found the way to whiter, safer teeth. You see the results on every hand—perhaps in teeth you envy. Send now for this simple ten-day test and see what your own teeth show.

Why teeth discolor

There is on your teeth a viscous film. You can feel it with your tongue. It clings to teeth, enters crevices and stays. That film is the teeth's great enemy. It dims them and destroys them.

The tooth brush fails to end it, for the ordinary tooth paste cannot dissolve it. So for months between your dental cleanings it may do a ceaseless damage.

It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea—a trouble which few escape.

Dental science has for years sought a way to fight that film. Five years ago the way was found and convincing tests have proved it. Now leading dentists everywhere advise it, and millions of people have been led to employ it.

The method is embodied in a dentifrice called Pepsodent—a tooth paste considered ideal by authorities. It is believed that its use will create a new dental era.

Supplied on request

A ten-day tube of Pepsodent is now sent to all who ask—to 10,000 people daily. This is done to let everyone know quickly what it does.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

Pepsin must be activated, and the usual agent is an acid harmful to the teeth. That is why it long seemed barred. But science has found a harmless activating method, so it can be daily applied to the film.

Two other new factors in teeth protection are also combined in Pepsodent.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coat disappears. A ten-day test will be a revelation.

Compare this new method with the old. Then let the clear results decide what is best for you and yours. Cut out the coupon now.
