TERMS--50 cents monthly in advance
2 cents per single copy

Entered as second-class matter May 26th 1917 at the Post Office at Christiansted, St. Croix, V. I. of the U. S. A., under the Act of March 3, 1879.

Contribution to this paper will be gladly received when the same deals with matters of general interest, and is accompanied with the author's name, as a guarantee of good faith. The editor cannot be responsible for the views of his correspondents nor does he necessarily endorse them.

Publication

FROM THE POLICE.

ALL owners of dogs are enjoined with-
in the ending of January month to procure from the Police Office (for Kingshill District from Kingshill Police Station) the signs for dogs prescribed by the Police Regulations, which according to same must always be worn by the dog, and for which Francs 10.00 must be paid for dogs in town and Francs 2.00 for dogs in the country.

After said time dogs met not wearing the sign for 1921 will be caught and brought to the Police Office (Kingshill Police Station) and detained for 3 times 24 hours, when it will be ruled, unless the owner appears to claim the dog, pays a fine of Francs 15.00 and eventually procures the required sign.

Christiansted's Police Office, St. Croix, the 29th December 1920.

A Gift

A 10-Day Tube of Pepsodent is sent to all who ask. See coupon.

Why Teeth Glisten

Millions of them—a new method

All statements approved by high dental authorities

You see glistening teeth now wherever you look, for millions clean teeth in a new way. We offer you here a ten-day test, to show the results on your own teeth.

The fight on film

Dental science has found a way to combat film on teeth—the film that dims teeth and destroys them.

Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. The ordinary tooth paste does not dissolve it, so brushing has left much of it intact. And very few people have escaped its damage.

It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea, which attacks 95 in 100.

Now, after years of research, a way has been found to combat it. Able authorities have amply proved its efficiency. Leading dentists everywhere now urge its daily use.

And millions of people now employ it, largely by dental advice.

The method is embodied in a dentifrice called Pepsodent. Two other new factors are combined with it. And this tooth paste is inaugurating a new dental era.

Free to all who ask

A ten-day test of Pepsodent is sent to all who ask. Also a book to explain the results. The method quickly proves itself.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

Pepsin long seemed impossible. It must be activated, and the usual agent is an acid harmful to the teeth. But science has found a harmless activating method, so pepsin can be every day applied.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coat disappears.

Do this for your own sake and your family's sake. Nearly everybody suffers from this film. Cut out the coupon so you won't forget.
