Is Your Blood Starving For Want of Iron?

**Iron is Red-Blood Food—Nuxated Iron Helps
Put Roses Into the Cheeks of Women and
Gives Strength and Energy to Men**

If you were to go without eating until you become weak, thin and emaciated, you could not do a more serious harm to yourself than when you let your blood literally starve for want of iron—iron that gives it strength and power to change food into living tissue, muscle and brain. Without plenty of iron in the blood, no matter how much or what you eat, your food simply passes through you without doing you any good—you don't get the strength out of it and instead of being filled with youthful strength and energy you are weak, nervous and all run-down. If you are not strong or well you owe it to your blood to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two or three grain tablets of ordinary Nuxated Iron three times per day after meals for two weeks, then test your strength again and see how much you have gained. Numbers of nervous, run-down people who were ailing all the while have most astonishingly increased their strength and endurance simply by taking iron in the proper form. But don't take the old kinds of iron simply to save a few cents. You must take iron in a form that can be easily absorbed and assimilated like Nuxated Iron. If you want it to do you any good, otherwise it may prove worse than useless. You can procure Nuxated Iron from any drug store on an absolute guarantee of satisfaction or your money will be refunded.
