S. S. "GUIANA"

is expected to sail from New York on the 4th March 1921.

S. S. "KORONA"

has been withdrawn.

SEALED Proposals will be received at the office of the Second Assistant Postmaster General until 4:30 p. m., March 1, 1921, for carrying the United States mails, for the term from April 1, 1921, to June 30, 1924, on the following-described route by the schedule stated, or such other schedule of like running time as the Postmaster General may prescribe, in safe and suitable steamboats or other power boats:

From San Juan, Porto Rico, by Charlotte Amalie to Christiansted, V. I., 107 miles and back, twice a week, by a schedule satisfactory to the department, in connection with mail steamers at San Juan.

Blanks for submitting bids, and elucidations, will be furnished by the postmasters on the route, at whose offices may be seen copies of the department's advertisement covering all details.—Advt.

NOTICE.

BEGINNING Jan. 25 DR. HARK will be in Christiansted four days each week; three days will be open for private practice, TUESDAYS, WEDNESDAYS and THURSDAYS.

Office, Company Street, opp. Apothecary.

Make This Test

See how teeth glisten then

This ten-day test costs nothing. To millions it has brought a new era in teeth cleaning. This is to urge that you try this method. Then let your own teeth show you what it means to you and yours.

To fight the film

The object is to fight the film which causes most tooth troubles. Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. The old methods of brushing do not end it. So, despite all care, tooth troubles have been constantly increasing.

It is the film-coat that discolors, not the teeth. And nearly all teeth brushed in old ways are coated more or less.

Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. And that disease has become alarming in extent.

Free

A 10-Day Tube of Pepsodent to anyone who asks.

It will show you the way to safer, whiter teeth.

See below.

A daily combatant

Dental science has now found ways to daily combat this film. For five years the methods have been carefully watched and proved. Now leading dentists everywhere advise them.

These methods are embodied in a dentifrice called Pepsodent. Millions now know it and employ it. Wherever you look the results are seen in glistening teeth today.

Acts in five ways

One ingredient in Pepsodent is pepsin. Another multiplies the starch digestant in the saliva to digest starch deposits that cling. The alkalinity of the saliva is multiplied also. That to neutralize the acids which cause tooth decay.

Two factors directly attack the film. One of them keeps teeth so highly polished that film cannot easily adhere.

With every application, Pepsodent combats the teeth's great enemies in new and efficient ways. To millions it is bringing cleaner, safer, whiter teeth.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

This test will be a revelation. Make it now. Cut out the coupon so you won't forget.
