Re: Relocation of Proposed Monitoring Well MW-11D
Tutu Service Station Investigation
St. Thomas, U.S. Virgin Islands

Dear Ms. Kwan:

As a result of physical access limitations (see Figure 6, Storm-Water Sewer) and the Lutheran Church of the Reformation property boundaries, Geraghty & Miller, Inc. recommends the relocation of MW-11D approximately 50 feet south of the proposed location presented in Geraghty & Miller's report dated April 10, 1992 "Technical Memorandum I, Tutu Service Station Investigation, St. Thomas, U.S. Virgin Islands." According to Reverend Larry Miller, the original proposed location of MW-11D was in close proximity of a storm-water sewer and was outside the Lutheran Church of the Reformation property boundaries. Figures 3 and 6 (enclosed) present the revised location for Monitoring Well MW-11D. The Tutu Environmental Investigation Committee (TEIC) has been given preliminary approval by the Church for the installation of MW-11D at this proposed location. Please replace Figures 3 and 6 of Technical Memorandum I with the enclosed figures.
