Is Your Blood Starving For Want of Iron?

Without Plenty of Iron in Your Blood
You Don't Get the Strength and
Nourishment Out of the Food You Eat

When over-work, lack of sleep, improper food and impure air sap the iron from your blood and make you feel weak, nervous, irritable and out-of-sorts, it is important that you should at once put more iron into your blood. Without iron the blood loses the power to change food into living tissue and therefore nothing that you eat does you the proper amount of good because you don't get the full strength out of it. Your food merely passes through your system like corn through a mill with the rollers so wide apart that the mill can't grind. Because of this steady starvation of the blood and nerves people often become weakened, tired-out, nervous and rundown and frequently develop all sorts of symptoms. But the moment organic iron—Nuxated Iron—is supplied, a multitude of dangerous symptoms disappear in most cases, the flesh becomes firmer, the muscles get back their strength and the roses of health bloom in cheeks that were pale and sickly looking.

No matter what other so-called remedies you may have tried, if you are not strong, vigorous, hearty and well, you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next, take two five-grain tablets of ordinary Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see for yourself how much you have gained. You can obtain Nuxated Iron from your druggist on the distinct understanding that if you are not fully satisfied your money will be refunded. For sale at all good drug stores.
