A New Cord Tyre For The Thrifty Buyer

*Here are the features that make the Goodyear Cross-Rib Cord the best tyre
value in its price class:*

1. A new tread—slightly flat, with the rubber properly placed to give traction, insures long wear and makes steering easier.
2. The tread rubber extends from bead to bead, resisting rut wear and curb wear.
3. The carcass is built up of 1 1/2" to 1 3/4" long staple Arizona and Egyptian cotton. (Fully 1/2" longer than is ordinarily used in tyres of this type—gives greater resiliency and tensile strength.)
4. It is cured on air—meaning that, pressure is developed from within, during the tyre's manufacture, and minimizing the possibilities of mud and debris.
5. Its layers of cords are built up according to the special Goodyear "Group Ply" principle, reducing internal friction in the body of the tyre.

ALL GOODYEAR CROSS-RIB CORDS HAVE THESE FEATURES—BOTH
IN THE INCH AND METRIC SIZES

*They are for sale at prices usually asked for cord tyres of work town quality
and doubtful performance.*
