A test of the new way to beautify teeth

This offer is now made almost the world over. It is published in many languages. Millions of people of many races have thus found a way to fight film on teeth.

All careful people owe themselves this test—all who want teeth whiter, safer, cleaner.

That dingy film

Your teeth are coated with a viscous film. Feel it with your tongue. It clings to teeth, enters crevices and stays. Your tooth brush used in old ways leave much of it intact.

Film absorbs stains, making the teeth look dingy. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

Teeth not clean

Film-coated teeth are unclean. That is why so many teeth brushed daily discolor and decay. Tooth troubles have been constantly increasing, and film is the cause of most of them.

Dental science, therefore, has sought ways to fight the film. Two ways have now been found.

Pepsodent
PAT. OFF.
REG. U.S.

The New-Day Dentifrice

A scientific film combatant, combined with two other modern requisites. Now advised for daily use by leading dentists everywhere. Supplied by druggists in large tubes.

Able authorities have proved their efficiency. Now leading dentists everywhere advise their daily use.

The methods are embodied in a modern tooth paste—Pepsodent. And millions of people now enjoy its benefits.

Acts in 5 ways

Pepsodent does more than combat film. It also fights starch deposits on teeth and acids.

It multiplies the salivary flow. It multiplies the starch digestant in the saliva, to digest starch deposits that cling and may otherwise form acids. It multiplies the alkalinity of the saliva, to neutralize the acids which cause decay.

Each use brings five effects which modern authorities regard as essential. It is bringing a new dental era.

One week tells

One week will show you what this new method means. It will change all your ideas on teeth cleaning.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

Judge then what is best for you and yours by what you see and feel. Cut out the coupon now.
