"Do This Daily

Cease old methods—fight the film on teeth"

Leading dentists the world over now give that advice.

Millions of careful people in some 50 countries follow it today.

You can see what it means. Note the prettier teeth in every circle now.

This is to offer a ten-day test so you may see its benefits.

A world-wide crusade

This is part of a world-wide crusade for whiter, cleaner, safer teeth.

Film is the great tooth enemy—it does not only stain your teeth, it clings to teeth, enters crevices, and causes decay.

Food stains, etc., discolor it. The film forms a coating of tartar. Tartar is based on film. That's why teeth were seen less often than now.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. That's why few escape tooth troubles.

Germes breed by millions in film. They, with tartar, are the chief cause of pyorrhea—so alarmingly common now.

Old ways did not successfully combat it

No ordinary tooth paste effectively fights film. So nearly everybody suffered from some film attack.

Then dental science searched for film combatants, and eventu-

ally found two. One acts to curdle film, one to remove it, and without any harmful scouring.

Able authorities proved these methods by many careful tests. Then a new-type tooth paste was created, based on modern research. These two new film destroyers were embodied in it.

That tooth paste is called Pepsodent. Now it has come into world-wide use, largely through dental advice.

Greater protection

Pepsodent also leads to greater protection. It makes the alkalinity of the saliva. That is there to fight acids, the cause of tooth decay.

Pepsodent also makes the starch digestant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

In all these ways, Pepsodent is fast bringing a new dental era.

You will be amazed

Pepsodent results will amaze and delight you. In a week you will realize how much it means to all.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

You will want those benefits for you and yours as long as you live, when you know. Cut out coupon now.

Protect the Enamel

Pepsodent of course keeps the film off your teeth. It does so by making the enamel softer than the film. Never use a film combatant which contains harsh grit.

Pepsodent MARK
TRADE

The New-Day Dentifrice

A scientific tooth paste based on modern research, free from harmful grit. Now advised by leading dentists the world over. On sale everywhere in two sizes.
