Colonial Council Office, St. Croix, April 15, 1922.

ROBT. L. MERWIN,
Chairman.

The New Laws on teeth cleaning—five of them

Dental science has adopted new laws on teeth cleaning. They mean whiter, cleaner, safer teeth to those who follow them.

Millions of people use these new methods, largely by dental advice. Now this ten-day test is offered to show every home the results.

1—Fight the film

The first law is to fight film—that viscous coat you feel. It dims the teeth and causes most tooth troubles.

Film clings to teeth, enters crevices and stays. Old ways of brushing do not end it. So few have escaped some form of film attack.

Film absorbs stains, making the teeth look dingy. It is the basis of tartar. It holds food substance which ferments and

forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

Two methods now

Two ways are now known to fight film. Able authorities have proved their efficiency. Leading dentists everywhere now advise their daily use.

Both are embodied in Pepsodent—a scientific tooth paste. They keep the teeth uniquely clean and also highly polished.

Three other laws

Modern starchy diet also calls for other helps to Nature. So every use of Pepsodent brings these three desired results.

1—A multiplied salivary flow.

No Charge

for a 10-day test. Simply mail the coupon and watch the delightful results.

2—Multiplied starch digestant in the saliva, to digest starch deposits that cling. 3—Multiplied alkalinity of the saliva, to neutralize mouth acids which cause tooth decay.

Thus Pepsodent fights two deposits—film and starch—which may do great harm to teeth. Also the destroying acids, and in Nature's way.

Brings a new era

These mean vast improvements on old methods. In fact, old methods brought the opposite effects. Pepsodent has introduced a new era in teeth cleaning, and millions now enjoy it.

Now we urge that you send for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Feel the other good effects.

Then decide by what you see and feel. Do this for your own sake. Cut out the coupon now.
