Subject: Information Repository
Tutu Wells Superfund Site, St. Thomas

Dear Ms. McCauley:

Thank you for agreeing to maintain an information repository for the Tutu Wells Superfund Site. The information repository is a file containing current information, technical records, and reference documents regarding a Superfund site. Its purpose is to allow interested persons in the community to review site-related documents at their leisure at a place and during hours which are convenient for them.

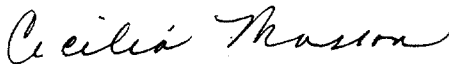

CDM Federal Programs Corporation (CDM Federal) will be sending you documents to place in the file periodically over the next two years. Each time we send a new document(s), we will also send an updated index for the information repository. In that way, when interested parties request access to the information repository, they can first read the index to identify which document(s) they would like to review. We anticipate that upon completion the information repository will occupy about one file drawer.

Therefore, enclosed in this package are ten (10) documents for the Tutu information repository, along with an index which lists each document by title. Again, we will update the index as additional documents are sent.

Your interest and cooperation in maintaining the information repository for the Tutu Wells Superfund Site is greatly appreciated. Please do not hesitate to call me at (703) 968-0900 should you have any questions.

Very truly yours,

CDM FEDERAL PROGRAMS CORPORATION
