NOTICE.

ACCORDING to paragraph 14 of Road Ordinance of June 1884.

The Inspection of the general annual repairs of the public roads with bridges culvers side walls, water-courses, hand rails etc., etc. shall commence after the 15 February.

All Roadholders are therefore requested to have their respective allotments in good efficient order by that date.

The repairs are now being carried on in a very inefficient manner and not according to the road regulations; the trenches are not dug out or cleaned properly, the roadway is too flat and has not sufficient crown to shoot off the water, and the road sides in many places are higher than the centre of the roadway.

The road must have a good-high crown so as to shoot off the water quickly and keep the roadway clean. The trenches must be dug out and cleaned out properly and the water from same must not be blocked off from its natural course but must have a good outlet so that it may not soften or effect the road bed.

No stones larger than one and a half inch must be used in the repairs and the boundary posts on each allotment must be plainly marked at each end so as to distinguish it at inspection, no material of a soft nature must be used in the repairs.

It is therefore incumbent on each roadholder to carry his obligations as prescribed by the Road Ordinance, if not, the defects found by the Inspection will be handed to the Government for further steps to be taken.

The roads must be kept up to the requirement of modern traffic, and it ought to be the duty of every loyal citizen to do his part in this respect.

Good and efficient roads are the first step forward in good Government and Civilization on modern lines.
