Contribution to this paper will be gladly received when the same deals with matters of general interest, and is accompanied with the author's name, as a guarantee of good faith. The editor cannot be responsible for the views of his correspondents nor does he necessarily endorse them.

BY THE GOVERNOR OF THE VIRGIN ISLANDS OF THE UNITED STATES.

A Proclamation.

THE President of the United States has by proclamation designated Thursday, the 25th day of November, 1920, as a day of thanksgiving and prayer.

WHEREFORE, I, J. W. OMAN, Governor of the Virgin Islands of the United States, do hereby designate the aforesaid date for observance as a day of thanksgiving and prayer by the people throughout the islands, inviting them to cease on that day from their ordinary tasks and to unite in their homes and in their several places of worship in ascribing praise and thanksgiving to God the Author of all blessings and the Master of our destinies.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the Government to be fixed.

Done at St. Thomas this sixteenth day of November, in the year of our Lord, one thousand nine hundred and twenty.

J. W. OMAN.

By the Governor:

LEO F. S. HORAN,
Acting Government Secretary.

This 10-Day Test

Has shown millions the way to white teeth

All statements approved by high dental authorities

This is how millions have found the way to whiter, safer teeth. You see the results on every hand—perhaps in teeth you envy. Send now for this simple ten-day test and see what your own teeth show.

Why teeth discolor

There is on your teeth a viscous film. You can feel it with your tongue. It clings to teeth, enters crevices and stays. That film is the teeth's great enemy. It dims them and destroys them.

The tooth brush fails to end it, for the ordinary tooth paste cannot dissolve it. So for months between your dental cleanings it may do a ceaseless damage.

It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea—a trouble which few escape.

Dental science has for years sought a way to fight that film. Five years ago the way was found and convincing tests have proved it. Now leading dentists everywhere advise it, and millions of people have been led to employ it.

The method is embodied in a dentifrice called Pepsodent—a tooth paste considered ideal by authorities. It is believed that its use will create a new dental era.

Supplied on request

A ten-day tube of Pepsodent is now sent to all who ask—to 10,000 people daily. This is done to let everyone know quickly what it does.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

Pepsin must be activated, and the usual agent is an acid harmful to the teeth. That is why it long seemed barred. But science has found a harmless activating method, so it can be daily applied to the film.

Two other new factors in tooth protection are also combined in Pepsodent.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coat disappears. A ten-day test will be a revelation.

Compare this new method with the old. Then let the clear results decide what is best for you and yours. Cut out the coupon now.
