ST. JOHN ISLAND

Where state, county, and/or county subdivision boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1) County subdivision is the generic term for a variety of geographic area types in the Island Areas. This includes the counties in American Samoa, municipalities in Guam, election districts in the Commonwealth of the Northern Mariana Islands, and census subdivisions in the U.S. Virgin Islands.
- 2) Estates are found only in the U.S. Virgin Islands.
- 3) Place name color corresponds to the place fill color.
- 4) The full BCU code consists of eight digits with an implied decimal point between the sixth and seventh digits. For legibility on this map, the leading zeros have been stripped and the decimal point is shown. To translate a BCU number on the map to the full code, add the appropriate number of leading zeros to the BCU number to reach eight total digits and remove the decimal between the last two digits.

Examples:

- a) BCU number on the map 37.00 represents BCU code 00003700
- b) BCU number on the map 1190.01 represents BCU code 00119001

5) An asterisk * following a BCU number indicates that the BCU number is repeated elsewhere in the BCU.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.
