Passenger and Light Delivering Truck.

Show Them

What this new way does

No mother wants children to suffer what she may have suffered from her teeth.

Then teach them the new way of teeth cleaning. Show the prettier teeth it brings, the whiter, safer teeth. Or let them make this test, and see and feel the benefits themselves.

Must fight film

Dingy teeth and most tooth troubles are now traced to film. One must fight to avoid them.

Film is that viscous coat you feel. It clings to teeth, gets between the teeth and stays. Stains, discolors it, then it forms dingy coats. Tartar is based on film.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea.

No ordinary tooth paste effectively combats film. So, under old methods, very few escaped tooth troubles. Beautiful teeth were less often seen than today.

Two ways found

Then dental science, after long research, found two ways to fight film. One acts to curdle it, one to remove it, and without any harmful scouring.

Able authorities proved these methods effective. Then dentists the world over began to advise their use.

A new-type tooth paste was created, based on modern research. The name is Pepsodent. Those two great film combatants are embodied in it for daily application.

Its new effects

Pepsodent brings other effects which research proved essential. It multiplies the alkalinity of the

saliva. That is there to constantly neutralize the acids which cause decay.

It multiplies the starch digestant in the saliva. That is there to digest starch deposits on teeth which may otherwise ferment and form acids.

Those are Nature's great tooth-protecting agents. Each use of Pepsodent gives them manifold effect.

For dainty people

Pepsodent is now used by millions the world over. Careful people of some fifty nations have adopted it, largely by dental advice. Dainty people—those who care for whiter, cleaner teeth—will never go without it.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

One week will give you a new conception of what clean teeth mean. It will point the way to a new dental era, both for you and yours. Cut out the coupon now.
