Beauty Without Grit

Without any harm to the teeth

Don't try to whiten teeth with grit that scratches the enamel. That's harmful. Use a soft polishing agent—the Pepsodent agent. Then combat the dingy film twice daily in this new, effective way.

That's what millions of people the world over are doing, largely by dental advice. Look about you and see the beautiful teeth that result.

Clouded by film

Teeth are clouded by a film. It clings to teeth, gets between the teeth and stays. Stains enter it, then the film, if left, forms the basis of dingy coats. That's why teeth lose luster. Film is also the basis of tartar.

Most tooth troubles are now traced to that film. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Germes breed by millions in it.

They, with tartar, are the chief cause of pyorrhea.

Stays on teeth

Under old methods, much of that film remained on teeth. It made teeth cloudy. Night and day it threatened serious damage. That's why so many brushed teeth discolor and decay. Tooth troubles have been constantly increasing.

Now dental science, after long research, has found two film combatants. Able authorities have proved their efficiency. Now leading dentists almost the world over are urging their daily use.

A new-type tooth paste has been created, based on five modern requirements. The name is Pepsodent. These two great film combatants are embodied in it for daily application.

Old ways wrong

Pepsodent also aids Nature in two essential ways. It multiplies the starch digestant in the saliva.

That is there to digest starch deposits on teeth before they ferment and form acids.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for the acids that cause decay.

Every use of Pepsodent thus gives manifold power to Nature's great tooth-protecting agents. Old-time tooth pastes had the opposite effect. They reduced mouth alkalinity, reduced the starch digestant with every application. That was due to their soap and chalk.

We urge you to see and feel these effects, then judge how much they mean.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Watch these delightful effects for a few days and you will always want them. Cut out the coupon now.
