An open smile

And the glistening teeth are one of her chief attractions.

Protect the Enamel

Pepsodent disintegrates the film, then removes it with an agent far softer than enamel. Never use a film combatant which contains harsh grit.

Which Smile

Is the more attractive?

They show prettier teeth nowadays

Note the open smiles—the glistening teeth — wherever you look today.

A change has come. Millions of people use a new way of teeth cleaning.

This is to offer you a delightful test, to show what it means to you.

Combat the film

The way to pretty teeth is by combating film.

Film is that viscous coat you feel. It clings to teeth, enters crevices and stays.

Food stains, etc., discolor it. Then it forms dingy coats. Tartar is based on film. That's why teeth lose luster.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. That's why few escape.

Germes breed by millions in film. They, with tartar, are the chief cause of pyorrhea, now so alarmingly common.

Teeth not clean

Old brushing methods left much film intact. They left the teeth unclean, to often discolor and decay.

So dental science searched for film combatants, and found two. One acts to curdle film,

and to remove it, and without any harmful scouring.

Able authorities proved these methods effective. Then a new-type tooth paste was created, based on modern research, and these two film destroyers were embodied in it.

That tooth paste is called Pepsodent. Now careful people of some 50 nations employ it, largely by dental advice.

Aids to Nature

Nature gives alkalinity to the saliva, to neutralize mouth acids. It puts a starch digestant in saliva, to digest starch deposits which may otherwise ferment and form acids.

Those agents were generally too weak. So Pepsodent multiplies that alkalinity, multiplies that starch digestant. So it gives manifold power to these tooth-protecting agents in the mouth.

Accept this test

Pepsodent is bringing a new dental era. The prettier teeth seen everywhere show that. Learn what it means to you.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth appear as the film-coats disappear.

You will be amazed and delighted. Cut out coupon now.
