

## Why So Pretty?

Analyze a beauty's beauty

Note how white teeth count

If you ever envy pretty teeth, let us show you how folks get them.

You see them everywhere today. They have brought to millions new charm and new beauty.

It is so the world over, for people are using a new cleaning method now. And largely by dental advice.

### They fight film

Film makes teeth dingy—that viscous film you feel. It clings to teeth, enters crevices and stays.

Food stains, etc., discolor it, then it forms cloudy coats. Tartar is based on film. That's why beautiful teeth were seen less often than now.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. That's why

tooth troubles came to nearly all.

Germs breed by millions in film. They, with tartar, are the chief cause of pyorrhea, now so alarmingly common.

### Old ways inadequate

No ordinary tooth paste effectively combats film. So nearly everybody suffered more or less.

Then dental science, after long research, found two film combatants. One acts to curdle film, one to remove it, and without any harmful scouring.

Able authorities proved these methods by many careful tests. Then a new-type tooth paste was created, based on modern research. These two great film destroyers were embodied in it.

That tooth paste is called Pepsodent. It is daily used by careful people of some 50 nations now.

TRADE MARK

The New-Day Dentifrice

A scientific tooth paste based on modern research, free from harmful grit. Now advised by leading dentists the world over. On sale everywhere in two sizes.

## Free A 10-Day Tube

See Coupon

### Protect the Enamel

Pepsodent disintegrates the film, then removes it with an agent far softer than enamel. Never use a film combatant which contains harsh grit.

### These things also

Dental research proved other things essential. So Pepsodent multiplies the alkalinity of the saliva. That is there to neutralize mouth acids, the cause of tooth decay.

It multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

Thus Pepsodent gives manifold power to Nature's great tooth-protecting agents.

### This test will tell

Pepsodent quickly proves itself. The changes in a week will delight you.

Send this coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

This test may change the whole dental history of your home. Cut out the coupon now.

## To Make Rich Red Blood

Revitalize your worn-out exhausted nerves and increase your strength and endurance

take Organic Iron; not metallic iron which people usually take, but pure organic iron—Nuxated Iron—which is like the iron in your blood and like the iron in spinach, lentils and apples. One dose of Nuxated Iron is estimated to be approximately equivalent (in organic iron content) to eating one-half quart of spinach, one quart of green vegetables or half a dozen apples. It is like taking extract of beef instead of eating pounds of meat. Nuxated Iron is partially predigested and ready for almost immediate absorption and assimilation by the blood, while metallic iron is iron just as it comes from the action of strong acids on small pieces of iron filings.

Over 4,000,000 people annually are using Nuxated Iron. It will not injure the teeth nor disturb the stomach. A few doses will often commence to enrich your blood. Your money will be refunded by the manufacturers if you do not obtain satisfactory results.

Beware of substitutes. Always insist on having genuine organic iron—Nuxated Iron. Look for the letters N. I. on every tablet. Sold by all druggists.
