

To Make Rich Red Blood

Revitalize your worn-out exhausted nerves and increase your strength and endurance

take Organic Iron; not metallic iron which people usually take, but pure organic iron—Nuxated Iron—which is like the iron in your blood and like the iron in spinach, lentils and apples. One dose of Nuxated Iron is estimated to be approximately equivalent (in organic iron content) to eating one-half quart of spinach, one quart of green vegetables or half a dozen apples. It is like taking extract of beef instead of eating pounds of meat. Nuxated Iron is partially predigested and ready for almost immediate absorption and assimilation by the blood, while metallic iron is iron just as it comes from the action of strong acids on small pieces of iron filings.

Over 4,000,000 people annually are using Nuxated Iron. It will not injure the teeth nor disturb the stomach. A few doses will often commence to enrich your blood. Your money will be refunded by the manufacturers if you do not obtain satisfactory results.

Beware of substitutes. Always insist on having genuine organic iron—Nuxated Iron. Look for the letters N. I. on every tablet. Sold by all druggists.

NUXATED IRON
for Red Blood, Strength and Endurance

Quebec Steamship Co.

THE S. S. "PARIMA"

was expected to leave New York on 6th inst., and is due at Frederiksted on or about 13th inst. proceeding to Windward Islands, accept freight and passengers.

They All Combat Film

Because the woman made this test

In millions of homes, the woman has asked for this ten-day test.

She showed the results to others—the whiter, cleaner, safer teeth that came from fighting film. And the family adopted this method.

Now you see prettier teeth everywhere. Men, women and children have them. Learn by this test how they get them.

That dingy film

Your teeth are coated with a viscous film. You can feel it now. It clings to teeth, enters crevices and stays.

Food stains, etc., discolor it, then it forms dingy coats. Tartar is based on film. That's why beautiful teeth were seen less often than now.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. That's why few escaped tooth troubles.

Germs breed by millions in film. They, with tartar, are the chief cause of pyorrhea, now so alarmingly common.

49 in 50 suffered

Under old methods, 49 in 50 suffered film attacks. So dental science sought for film combatants. Two ways were

Protect the Enamel

Pepsodent disintegrates the film, then removes it with an agent far softer than enamel. Never use a film combatant which contains harsh grit.

eventually found. One acts to curdle film, one to remove it, and without any harmful scouring.

Able authorities proved these methods effective. Then a new-type tooth paste was created, based on modern research. These two great film destroyers were embodied in it.

That tooth paste is called Pepsodent. Now careful people of some 50 nations employ it every day.

Other essentials

Research also proved other things essential. So Pepsodent multiplies the alkalinity of the saliva. That is there to neutralize mouth acids, the cause of tooth decay.

It multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

Thus Pepsodent is bringing a new dental era, by doing what must be done.

Quick changes come

The results of Pepsodent are quick and apparent. One week will bring a revelation.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

Compare the results with old methods. Then you will know what this new way means. Cut out coupon now.
