

Greenwater tank – 200 m³

- Stocked with 5,000 fingerlings
- Produces 5,000 lbs. every 6 months
- Requires daily feeding, aeration and solids removal

Clarifier and base addition tank

- Solids removed in 500 gallon conical bottom clarifier
- 1/3 HP circulating pump used
- pH maintained at 7.5 with daily addition of $\text{Ca}(\text{OH})_2$

Denitrifying tanks

- Future research for management of nitrate by anaerobic processes.
