## THE NEW ST. CROIX SAVINGS BANK

On Saturday the 2nd June 1923.

RECEIVERS:

**In Christiansted**

A. E. STAKEMANN Trustee.

**In Frederiksted**

R. E. HIGGINS Trustee.

Balance of deposits to 26th May 1923

\$ 71 006.20

26 Deposits, of which

18 in Christiansted \$ 235.68

(- new)

8 in Frederiksted \$ 27.65

(- new)

\$ 263.33

\$ 71,269.53

14 withdrawals of which

10 in Christiansted \$ 250.85

4 in Frederiksted \$ 29.52

\$ 280.37

Balance of deposits to date \$ 70,989.16

Receivers for Saturday the 9th June 1923

**In Christiansted**

A. E. STAKEMANN Trustee.

**In Frederiksted**

R. E. HIGGINS Trustee.

A. E. STAKEMANN.

President

## Notice to the Public.

THE attention of the public is invited to the fact that repairs are being made on King's Street between Market and West Streets. Traffic will please detour from time to time as indicated by barricades, which will be placed only when it is necessary.

JOHN C. GEBHARD,  
Asst. Public Works Officer.

**OPTICAL AID.**

Send your order, broken lens or prescription through the mail.

F. M. CORNEIRO,  
St. Thomas, V. I.

# FREE

## A 10-Day Test

You owe this to yourself. Learn what film removal means. Bring out the natural luster.

Careful people, the world over, now brush teeth in this way.

Mail the coupon.

# Don't Scratch Teeth

## Beautify them in this scientific way

Don't try to whiten teeth by use of harsh abrasive. The enamel, if you harm it, won't come back. Polishing agents should be mild, as in Pepsodent.

Combat the dingy film. Do it as millions now are doing—in this scientific way. Then the prettier teeth you see everywhere now will come to you and yours.

### The cloudy film

Your teeth are coated with a viscous film. It clings to teeth, gets between the teeth and stays. When not combated, it forms the basis of tartar. Film absorbs stains, making the teeth look dingy. Those cloudy teeth rob millions of much beauty.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Germes breed in it, and they,

with tartar, are the chief cause of pyorrhea. Thus most tooth troubles are now traced to film.

### Ways to end it

Film has been the great tooth problem. Old methods did not end it. So well-brushed teeth discolored and tooth troubles have been constantly increasing. Now dental science, after long research, has found two ways to fight film. Able authorities have proved their efficiency. Careful people the world over now see and feel the results.

A new-type tooth paste has been created, made to meet modern requirements. The name is Pepsodent. These two film combatants are embodied in it for daily application.

### Five new effects

Pepsodent brings five effects which science now demands. One is to multiply the starch diges-

tant in the saliva. That is there to digest starch deposits on teeth before they ferment and form acids. One is to multiply the alkalinity of the saliva. That is Nature's agent for neutralizing mouth acids—the cause of tooth decay. It leaves the teeth so highly polished that film less easily clings.

All five effects come from every application. So film, starch and acids are constantly combated. Forces are created which night and day fight enemies of teeth.

To countless homes, all the world over, this has brought a new era in teeth cleaning. The results will be life-lasting.

Send the coupon. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. The results will surprise and convince you. Cut out the coupon now.
