NUXATED IRON

-MASTER STRENGTH BUILDER OF THE BLOOD

The Power Behind the Strong
Sturdy Men and Healthy
Beautiful Women of Today

"To make strong, keen, red-blooded Americans there is nothing in my experience which I have found so valuable as organic iron-Nuxated Iron" says Dr. James Francis Sullivan, formerly Physician of Bellevue Hospital (Outdoor Dept.), New York and the Westchester County Hospital. Nuxated Iron by enriching the blood and creating new blood cells strengthens the nerves, rebuilds the weakened tissues and helps to instill renewed energy and endurance into the whole system. It often increases the strength of weak, delicate people in two weeks' time. It is estimated that over 3,000,000 people use Nuxated Iron annually as a tonic, and blood-builder.

MAKE THIS TEST YOURSELF And Find Out Where Your Blood Stands

See how long you can work or how far you can walk without becoming tired; next take two five-grain tablets of Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. Numbers of nervous, run-down people who were ailing all the while have most astonishingly increased their strength and endurance simply by taking iron in the proper form.

Manufacturers' Note: Nuxated Iron recommended and prescribed by physicians is not a secret remedy but one which is well known to druggists everywhere. Unlike the older inorganic iron products it is easily assimilated, does not injure the teeth, make them black, nor upset the stomach. The manufacturers guarantee successful and entirely satisfactory results to every purchaser or they will refund your money. It is the best and most reliable of all iron preparations.

DISTRIBUTORS: APOTHECARY HALL,
ST. THOMAS.

TOO HIGH, TOO HIGH, TOO D—d HIGH.

Years ago a gentleman lived in New Orleans and was much interested in financial and commercial matters and was quite an operator on 'Change and as a rule always operated on the bear side. This grew upon him as years advanced until it became somewhat notorious and his expressions were regarded as mental exaggerations rather than as carefully considered conclusions. This man was Addison Cammack, who finally sought a larger field for his operations in New York, where he continued to practice his bear tactics. It was said that on one occasion a friend remarked that the moon looked "beautiful tonight." The response from Cammack came quickly, "too high, too high, too d—d high."

We are led to wonder what can be the thoughts of those who hold the prices of sugar down to a low level because they come from weaker nations. Such a movement was inaugurated by England and quickly followed by the United States and the tropical countries were thus compelled to accept lower prices for sugar than just and square under all of the circumstances. The weak peoples had to suffer and England and America had their own way and sugars were held down to low levels. It would look very much as though the spirit of Addison Cammack had risen from the dead and taken possession of some people and that whenever the word sugar was uttered there would come a gasp of "too high, too high; too d—d high."—Louisiana Planter, 17th July.
