Try This Way Combat the film on teeth

Every careful man or woman should learn what it means to fight film.

Dentists urge it. Millions of people have profited by it. All the world over are seen the results, such as you would gladly have.

Ask for this 10-Day Tube.

Film is dingy

You feel on your teeth a viscous film. It clings to teeth, enters crevices and stays. The tooth brush used in old ways does not effectively combat it. So countless teeth are dimmed and ruined by it.

Film absorbs stains, making the teeth look dingy. It forms the basis of cloudy coats. Tartar is

based on film. It holds food substance which ferments and forms acids. It holds the acids in contact with the teeth to cause decay.

Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea. Thus most tooth troubles are now traced to film.

New methods now

Dental science has in late years found two ways to fight that film. One acts to curdle film, one to remove it, without any harmful scouring. Able authorities proved these methods effective. Then a new-type tooth paste was created, based on modern research, and

Protect the Enamel

Pepsodent disintegrates the film, then removes it with an agent far softer than enamel. Never use a film combatant which contains harsh grit.

those two great film combatants were embodied in it.

The name of that tooth paste is Pepsodent—now advised by leading dentists the world over. It does what nothing else has done.

Two other needs

Investigators also found two other things essential. So Pepsodent multiplies the alkalinity of the saliva. That is there to neutralize mouth acids, the cause of tooth decay. It multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise ferment and form acids.

Old-time tooth pastes had the opposite effect. They reduced those natural tooth-protecting agents in the mouth.

Some 50 nations use it

Careful people of some 50 nations now use Pepsodent, largely by dental advice. You see the results in glistening teeth wherever you go today.

Make the test we offer. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. One week will convince you that this new way brings results you need. Cut out the coupon now.
