**RE: TuTu Well Field Project
Delegarde Well Analytical Results**

Dear Ms. Kwan,

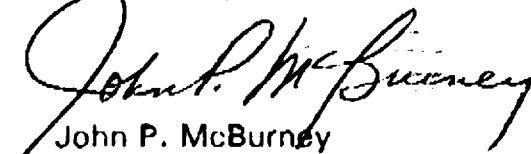

Attached please find a memo from Geraghty & Miller to **de maximis, inc.** which reports the results of the May 26, 1994 and July 27, 1994 samplings of the Delegarde Supply Well.

Please note that tetrachloroethene has been detected above the Federal Drinking Water Standard.

Confirming our discussions, you will communicate this information to the DPNR so that an appropriate course of action can be determined.

Sincerely,

de maximis, inc.

John P. McBurney
Project Coordinator for TEIC
